November 2016 →

Desktop

Lead Software Architect

Desktop is your personal space for your creativity.

Query Relational Data with GraphQL at Dreamforce in October 2016

Contributions on **Apollo GraphQL Client**

Converted a large legacy Backbone codebase to React+GraphQL

June 2016 →

December 2015 →

Jolicloud

Lead Software Architect

Jolicloud is the independant cloud operating system.

Started as an intern, stayed as a contractor

Rolled production updates to 1M+ subscribed users

Rewrote essential parts of the product using React & Javascript ES6

May 2015 →

Sept. 2014 →

Anyfetch

Software Engineer & Dev. Ops. Intern/Contractor

Anyfetch built a powerful multi-cloud indexing technology.

Maintenance on **Anyfetch Open Source**

Worked on the core tech with Node.js, MongoDB, Redis and Elasticsearch

Dev Ops server automation setup

July 2013 →

ACADEMIC

June 2017

Georgia Institute of Technology

CS - Machine Learning - Master of Science

Grades/GPA: TBA

Jan. 2017

June 2016

Georgia Tech Lorraine

CS - Machine Learning - Master of Science

Grades/GPA: 4.0

CS8803 - Mobile Apps & Services - 2nd best app of the school - Powered by React Native & Relay

CS7641 - ML Algorithm Experiments & Papers

CS6250 - Cloud Backbone IPv6 measures

CS7641 - Machine Learning

CS7641 - ML for Trading

CS6250 - Computer Networks

Jan. 2016

Dec. 2015

INSA Lyon

Computer Science - Engineering Degree (Master)

Grades/GPA: Ranking: 6/112, Average: 14.85/20

Contributions on **Firefox for Android**

SmartCity Mobile App - Best app of the school - Node.js backend + Swift App

Google Hashcode Contest, first edition - Qualified to compete at Google France

English - Complete fluency in Academic & Professional domains - TOEFL: 105/120, TOEIC: 985/990 & GRE, Verbal Reasoning: 152/170

German - Spoken - B1 European certification

Sept. 2011
